

The **DEBRIEF**

Welcome to the inaugural newsletter from our team at the North Dakota Unmanned Autonomous Systems Council!

Each month, the NDUASC will be providing crucial updates, sharing information, making announcements and highlighting the stories important to our members. Included in the newsletter, you'll receive a monthly *DEBRIEF* from me detailing the successes and solutions that the NDUASC is achieving on a daily, weekly and monthly basis.

Since forming in 2024, our list of council and member accomplishments is long. From adding globally recognized members, to highlighting members on the cutting-edge of the UAS

ecosystem making national headlines, it's clear that our collective efforts to expand, advocate and grow the industry—and our respective UAS missions—is having an immediate impact.

We urge you to join us on Wednesday, January 15, 2025, at the UAS Legislative Day in Bismarck, ND, to make our impact strong at the start of the new year. Connect with members. Network with industry. Advocate and tell the powerful story of the NDUASC's impact on the near- and long-term future of UAS in North Dakota and its role in shaping the industry across the world. Play a part in helping all of us fly further.

See you in Bismarck.

Matt Dunlevy
